Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of species (a), Figs. 12A-12B, in Paper No. 7 is acknowledged. However, it appears that applicant's remarks concerning claims 3, 4, and 9 reading on the elected invention are in error. Claims 3 and 4 relate to features related only the seventh through tenth embodiments as set out on page 29 of the specification and claim 9 also relates to features not disclosed with respect to species (a). Therefore, claims 3, 4, and 9 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim. The requirement for restriction is made FINAL.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The scope of claim 7 is unclear until the units of the angle "theta", degrees, radians, or whatever, is clarified.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2872

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, 6, and 7 (as far as definite) are rejected under 35 U.S.C. 102(b) as being anticipated by Hayashi.

See the Fig. 6 embodiment of Hayashi.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hayashi.

It would have been obvious to one of ordinary skill in the art to provide a symmetrical transmissive system in lieu of the reflective system of Fig. 6 of Hayashi because the equivalence of such systems is well known, as variously disclosed by Hayashi and applicant's own disclosed prior art, and relates merely to whether a reflective or transmissive analysis, both of which are commonly useful, is being made.

Allowable Subject Matter

8. Claims 4 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. The following is a statement of reasons for the indication of allowable subject matter. The prior art does not teach or fairly suggest a differential interference optical system including all of the features of dependent claims 5 and 8, including the "perpendicular" related features of

Art Unit: 2872

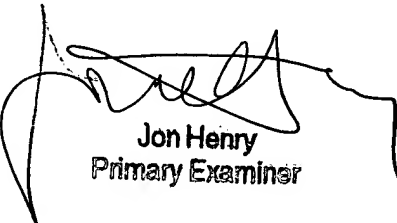

those claims. Note that the applied Fig. 6 embodiment of Hayashi, unlike other disclosed embodiments, does not disclose or make obvious such features in the claimed combinations of dependent claims 5 and 8.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Otaki, Kitagawa, De Veer, and Nomarski are cited to show differential interference optical systems.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jon W. Henry whose telephone number is (703) 305-6106.
